Dr. Ami, F.R.S.C. Delivered Illustrated Lecture

PALEOLITHIC AGE

Members Of Canadian School Have Reached Psychological Moment

At a public meeting of the McGill chapter of the Sigma XI held last evening in the Moyse Theatre Dr. H. M. Ami, F.R.S.C. gave an illustrated lecture on "Primitive Man in France and the work of the Canadian School of Prehistory." The vice-president of the society Prof. W. G. McBride, B.Sc. of the department of Mining Engineering introduced the lecturer.

Dr. Ami spoke of the work of the Canadian School of Prehistory and their work in the Dordorne region, where a site near Comte Q'uappell has been leased to them by the French government, through the Academie Des Beaux Arts, and his slides consisted of photographs of their excavations and discoveries there and also included pictures of the findings of their co-workers all over Southern France and in Italy. The seven members of the Canadian School have investigated this "Paleolithic capital of Southwestern Europe" for a period of four years and have sent thousands of specimens to the museums of the Canadian Universities, 2,000 of which are in the Redpath Museum at McGill. The Canadians have reached the psychological point in their excavations, Dr. Ami said, and have already found 15,000 specimens during last year.

Slides depicting the remarkable effects of erosion by water in these regions were shown, and the lecturer explained that the caves and the shelters so formed influenced Prehistoric men to take up residence there in fact today houses are built in the shelter of these over-hanging cliffs and on the cliff-face itself. Specimens of the skull of the Cro-Magon man were discovered here, a highly intelligent type of prehistoric man, said "The Old Man of Mentone," A complete skeleton of a man about six-feet, ceven inches in height, is a representative of this age.

Examples of pre-historic wall-paintings and engravings colored with earthen pigments are very numerous in southern France and Spain. Drawings of horses, reindeer, bison and mammoths have been executed skillfully and beautifully by these old cave-dwellers. Clay sculpture and ivory carving on elephant tusks have been found. Representations of human beings are hardly as accurate and the well-known "Venus of Lioset" clearly shows this. A strange engraving in one of the caves owned by Count Begouin in the Pyrences is the figure of an animal with the body of a bison, the tail of a horse, the eyes and face of an owl, the antlers of a stag and the feet and legs of a man and a bear. This is probably symbolic and illustrates the mysticism and symbolism of the art even in those pre-historic times.

Many of the implements and ornaments of those times have been found. Shell necklaces, needles, made of slivers of bone, saws, harpoons and even whistles and propelling instruments were used.

Skulls of the musk-ox and skeletons of men and children representative of different ages have been excavated although it has been found that bone decays rapidly when buried in earth.

The every-day life of the pre-historic inhabitants of Europe may easily be imagined when one inspects the numerous specimens which the pre-historians have unearthed. Cooking implements have been discovered in every one of the easily recognized strata. Even the remains of the animals upon which they subsisted may be seen among the debris left by the Neanderthal, Paleolithic, Neolithic and Cro-Magnon men, who probably ate the flesh of the horse, reindeer, mammoth, elephant and cave-bear.

Their burial customs were in some measure similar to those of the ancient Egptians, in that they interred their dead along with their ornaments weapons and implements. The skeleton of what is assumed to have been an artist, buried with the materials of his calling, was found in France. It has been acquired by the University of Chicago and forms a nucleus

Forum To Hear Norman Thomas, Noted Socialis.

Norman Thomas of New York, Executive Director of the League for Industrial Democracy and contributing editor of the Nation and the World Tomorrow, is speaking at the Y.M.C.A. Forum tomorrow afternoon. His subject will be "Extension of Public Ownership."

Mr. Thomas is best known as the leader of the Socialist movement in the United States. At the last election, he was the candidate of the Socialist Party for President. He is looked upon as one of the foremost liberls of the day, and is a forceful and eloquent speaker on economics and international problems.

Norman Thomas is a graduate of Princeton University and of Union Theological Seminary. He spent two years in settlement work and some months in travelling around the world He served for some time as a pastor in the Brick Presbyterian Church in New York City, and did extensive welfare work among the East Side population. In 1918 he left the church and has since given all his time and efforts to the cause of social advancement.

Treats Subject Of Popular Arts

Products of Looms of Czecho-Slovakia Displayed

GEORGES BOUCHARD

Work of Canada in Handicraft Placed Second to None

Gay and colorful was the scene which greeted the appreciative eyes of those who attended the lecture in Moyse Hall recently.

Platform and speakers table were decked with shawls and scarves of many hues—specimens of handwork done by the peasants of Czecho-Slovakia. The lecture, given under the joint auspices of the Canadian Handicrafts Guild and McGill University, was delivered by Georges Bouchard, well-known as the author of "Autres Temps, Autres Moeurs." Mr. Bouchard is also the member of the Congress, and official representative for Canada.

Mr. Bouchard has travelled in many different countries and has made a special study of the handicraft production of the labouring classes, particularly those of the peasants and tillers of the soil. Popular art, the speaker explained, is fast disappearing on account of the great increase in trade, industry, and modern labour-saving devices. He was glad that he was old-fashioned enough to remember with mingled pleasure and regret the typical peasant home in Germany, France and French-Canada, where, the loom, spinning-wheel, and treadle play a part as important as the plough and reaping-hook. The picture of a true French-Canadian farm, even at the present day, is one of ceaseless activity, both indoors and out

The speaker impressed on his speakers the important part this popular art has played in the growth of Canada. Evidences of popular art exist as much if not more, in Canada as in any other country in Europe. We Canadians, therefore, should exert a determied effort in the furthering of the movement towards preserving and reviving this popular art, whose artistic and economic value cannot be denied.

To this end, co-operation, concentration and an insight into the existing conditions is imperative. The work cannot be tackled in a half-hearted manner.

With the purpose of furthering popular art, the Congress passed a resolution to the effect that a study of conditions should be carried on to

Philosophical Society

The next meeting of the Philosophical Society will be on Thursday, February 7th at 8 p.m. in the Arts Reading Room. The speaker of the evening will be Dr. J. A. Hickson, and his subject will be "Some Tenets of Modern Idealism." Dr. Hickson was formerly a professor in the department of Philosophy at McGill, and there is every assurance that the Subject will be dealt with in an able and masterly manner.

An opportunity will be given for questions and discussions after the Speaker has concluded. All students are welcome to attend.

Varsity Ban Now Rests With Students

Board of Governors' Meeting Leaves Matter To Council

NO RESIGNATION

Whole Question Of Editorial Policy To Be Settled By Detailed Inquiry

(Special to McGill Daily)

Toronto, Feb. 1.—The matter of the threatened ban of "The Varsity" by the board of governors of the University of Toronto have been placed in the hands of the executive of the Students' Council. This was decided at the meeting of the board of governors. From what your correspondent could ascertain after a weary trip to the Queen City tonight the matter will be finally settled Monday morning the executive of the Students' Council will meet the departmental editors of "The Varsity" Monday morning when the entire editorial policy will be reviewed after which, your correspondent learns, the "The Varsity" will settle down to its former staid existence, with the editorial board intact. Resignations bans and such like were merely matters of conjecture and the storm that the governors threatened has resolved itself into a gentle flurry.

The executive of the Students' Administrative Council convened this afternoon and decided merely "To meet" the department editors of "The Varsity" on Monday.

Your correspondent also learns that the entire affair was not merely a cropping up of the sex instinct among the students of the Varsity. The actual editorial was not the bone of contention among the students. It was the "Freedom of the college press" that was at stake and there is no doubt that the editors of "The Varsity" have won a signal victory for the student press of the Dominion.

The press of this noble city have failed to see this viewpoint and have crammed the columns of their papers during the past two days with interviews. Imaginary and otherwise, and articles and pictures of all sorts. The "Telegram" last night carried a sweep on the first page and a four column reproduction of the editorial page of "The Varsity". "The Daily Star" today carried 11 pictures of

Touring Debaters Defeat Toronto

Win Over Varsity On Censorship Motion

(Special to McGill Daily)

Toronto, Feb. 1—Members of the debating team from Western Canada, who are touring eastern Canada under the auspices of the National Federation of Canadian University Students vanquished a University of Toronto team. They upheld the resolution, "That this house is opposed to all forms of censorship" which was sustained by a vote of 42 to 30. The debaters arrived Thursday morning and began a three-day program of activities. Previous to the debate, the tourists were entertained at dinner by the Joint Executive of the Students' Administrative Councils. In the afternoon, they made a tour of the University. Yesterday they drove around the city, and were the guests of Knox College for the afternoon. Today St. Michael's College and Trinity College are acting as hosts to the team.

The team from the west were Nelson Chappel, B.A., University of Alberta; Bryce MacKenzie, University of Saskatchewan; and W. J. Masterson, University of British Columbia. They were opposed by Douglas McRae of the School of Applied Science J. T. Wilson, of Trinity College, and J. R. M. Wilson of Victoria College.

They contended that the present system of censorship was useless and its failure a proof of its inadequacy. It was an attempt to impose the will of the few upon that of the many. The Toronto debaters showed that restraint was an essential element in liberty. Protection was necessary for the young and the uneducated.

Student Tickets

Coupon No. 15 will admit students to the McGill-Western game which takes place in the High School Gym at 8 o'clock.

First Month Of Year Slightly Above Normal

Weather records at the Observatory show that the average temperature of the month just closed was a degree higher than normal, though slightly lower than the average temperature of January, 1928. The most unusual thing, however, was the wide variation in thermometer readings about the middle of the month. On Jan. 19 a maximum temperature of 48 degrees was recorded, and on Jan. 44 a minimum of 15 degrees below zero was observed, giving a range of 63 degrees.

Over two and a half inches of rain was also recorded. The total snowfall was approximately normal, though only about half of the entire amount remained on the ground.

Set Dates and Announce Cast of Insect Play

Many Former Stars Are Taking Part

FEBRUARY 22, 23

Designs For Costumes Have Now All Been Completed

The Insect Play will be presented in Moyse Hall on Friday and Saturday, February 22 and 23, it was definitely announced yesterday by Leon Shelley, President of the Players' Club.

The cast is as follows:

A Tramp ..... Richard Eve
A Lepidopterist ..... Cluny Dale
Clytie ..... Kathleen Bovey
Otto ..... Harry Donald
Felix ..... Tom Gillespie
Iris ..... Reta MacDonald
Victor ..... Jack DesBaillets
A Chrysalis ..... Katherine Black
Mr. Beetle ..... Cluny Dale
Mrs. Beetle ..... Dorothy Stein
Another Bettle ..... George Broderick
Ichneumon Fly ..... Leon Shelly
Larva ..... Margaret Murray
Mr. Cricket ..... George Nicholls
Mrs. Cricket ..... Grace Gilson
A Parasite ..... Albert Lapin
Blind Timekeeper ..... N. Levitsky
Chief Engineer ..... Sydney Pierce
Second Engineer ..... Philip Sise
An Inventor ..... Fred Poland
A Messenger ..... George Broderick
Second Messenger ..... Halpin
A Signal Officer ..... Bruce Hanbury
A Journalist ..... Donald Black
A Philanthropist ..... George Gales
The Commander-in-chief of the Yellows ..... George Nicholls
Moths ..... Alice Gilmore, C. Stairs, Margaret Cameron and others.
First Snail ..... Alma Johnson
Second Snail ..... Phyllis Lee
A Wood Cutter ..... Denny

Although this cast is subject to change, most of the parts have been definitely decided upon. The super ants and other parts have not yet been chosen. Robert Picard will act as prompter.

The Business Manager in connection with this play is G. How, while the committee in charge of tickets, publicity, production and costumes are headed by H. Webster, F. Stone, H. Greig and B. Carter respectively.

Those in charge of production report that excellent progress is being made in the rehearsals. Some of the major parts are being well handled by the experienced members of the club who have starred in other productions. The large cast is affording a great opportunity for many of new members to show their talent, some of whom give promise of real ability upon the stage.

All the designs for costumes and scenery are now completed and several members are busy making the large supply of costumes and scenery that the Insect Play requires.

With the cast now practically complete and all committees in full swing the executive is confident of making a success out of its latest and largest undertaking. Tickets may be obtained from class representatives next week.

Historical Club

The sixth regular meeting of the Historical Club will be held at the residence of Mr. Murray Williams, 44 Trafalgar Avenue, on Tuesday, February 5th at 8.15, when G. D. McIntyre and M. G. Ballantyne will read papers on "Recent Discoverics in Ur" and "Recent Discoveries in Indo-China," respectively. All members are asked to attend as important business will be brought up.

Dr. A.V. Douglas At Physics Club Last Evening

Discussed Molecular Cyanogen In Hot Stars

SPECTRA STUDIED

Expansion And Contraction Of Stars Causes Changes In Spectra Of Some Metals

The presence of molecular gases in very hot stars where they could not normally exist is explained by the ceaseless bombardment of meteorites, said Dr. A. Vibert Douglas speaking to the Physics Club in the MacDonald Physics Building last night, on the subject of "The Behaviour of Vanadium and Cyanogen in Stellar Atmospheres".

Throughout her address Dr. Douglas referred to spectograms of Nu Aquilae and the Pole Star. These giant stars composed of gases at very high temperatures, have densities as low as .0008 and have masses many times greater than our sun. They are extremely large and the sun, compared to them in volume would be as a pea to a football. They exhibit the peculiarity of expanding and contracting at regular periods with a resultant increase and decrease in the speed with which the surface facing the Earth approaches us. On contraction the stars in question heat up, and on expansion the gases become cooled. This changes the brightness of the stars at regular intervals. The minimum of brightness is attained shortly after the minimum of size.

These changes also effect the spectrum. The bands of ionized vanadium, when investigated and plotted over the intervals of expansion and contraction, and then compared with other neutral bands are found to vary in size during the period but at a different time from which the brightness of the star varies. The band of the hydro-carbons also varies, but almost at the same times as the changes in brghtness. Traces of CN, cyanogen, are found in these extremely hot stars, and the cyanogen band on the spectrum also varies, but its variations are the very opposite of the hydro-carbon band.

It has been speculated that if an

(Continued on page four.)

Bookplates Now On Exhibition

Many Chinese Square Marks At Library

A fine exhibit of bookplates opened yesterday in the exhibition gallery of the Redpath library. It includes a large number of German plates, various university plates as well as the McGill plates, and an extensive collection or armorial plates some of them dating back to the seventeenth century. Among the original plates are those of David Garrick, Maxine Elliott, Oliver Wendell Holmes, two different plates of Eugene Field, the plates belonging to Peter Redpath, the founder of the Redpath library of McGill, and Grace Redpath.

Some of the plates are shown attached to the books to which they belong. In this category is the plate in Frances Willughby's book on ornithology, which is now in possession of McGill, and which came from the library of Samuel Pepys. Two different Pepys bookplates are on view, Pepys having used four different plates for his books.

The Gest Chinese Research library housed at McGill has loaned square marks corresponding to the bookplates employed in the western world. The original of one of these plates shown at McGill was done in stone in the hall of the classics connected with the Confucian temple at Pekin. At the head of each of the thirteen classics in this hall are found two imperial seals or marks of ownership, which were carved in stone in 1791.

In connection with the Chinese specimens in the exhibit is the Chinese seal, a form of bookplate used in China. In illustration of this is a commentary on the literary works of the great statesman, essayist and scholar, Han Yu, who lived from 768 to 824 by the famous philosopher, Chu Hsi who lived from 1130 to 1200. The impressions from seals in this volumn indicate the ownership of the book.

Books on bookplates in French, German and English are also contained in the exhibit as well as a collection of publishers' marks.

The exhibit, which will be open to the public until March, has been arranged by G. M. Furman under the direction of Dr. G. R. Lomer, McGill librarian.

University Of Western Ontario To Debate Here

The Western University's debating team will meet the McGill team here on Wednesday evening February 13th in the ballroom of the Union.

A short meeting of the Debating Executive was held last night in the Union to discuss the selection of the local team and plans for the meeting There will be no charge for students but the general public may be assessed a slight levy. The names of the McGill debaters have not been made known yet but will be announced within the next few days.

The debate will be under the auspices of the National Federation of Canadian University Students.

Jobs Open In Civil Service

Positions Available For Jr. Trade Commissioners

POSTS ABROAD

Preference Given To Graduates Holding The Degree of Bachelor of Commerce

In answer to the many inquiries for information with regard to the Commercial Intelligence Service, especially from applicants desiring to be appointed to the position of Trade Commissioner abroad, the following information is compiled:—

1.—Under the provisions of the Civil Service Act and Regulations all appointments to the Commercial Intelligence Branch of the Department of Trade and Commerce are made by the Civil Service Commission, Hunter Building, Ottawa, to whom all applications should be addressed. This includes Trade Commissioners and Assistant Trade Commissioners abroad, and Junior Trade Commissioners in training at Ottawa, but does not include the clerical staff in the offices of Trade Commissioners.

3.—Junior Trade Commissioners appointed by the Civil Service Commission after competitive examination as requests are made from time to time by the Department of Trade and Commerce to the Civil Service Commission to appoint one or more Junior Trade Commissioners.

3.—Junor Trade Commissioners after a course of training in the Department are promoted, if found suitable, to Assistant Trade Commissionerships and Trade Commissionerships.

4.—Usually the Department stipulates that applicants must be graduates of a recognized university in Canada, preferably with the degree of Bachelor of Commerce. From time to time preference is given to those having certain linguistic attainments. Under the law preference is also given to returned soldiers. The minimum age limit on appointment is 18, and the maxamum 35.

5.—The salary of a Junior Trade Commmissioner on appointment is $1920. After six, eight or twelve months' training in the Department at Ottawa he is promoted to some post abroad, as occasion or emergency requires, as an Assistant Trade Commissioner at a salary of $2460, (with annual increases up to $2940), plus fixed for the post to which he is asthree quarters of the living allowance signed. The living allowance at present authorized ranges (according to the cost of living at the various posts) from $1500 to $4000.

6.—The range of a Trade Commis-

Compounders Had Gay Time At Mt. Royal

Annual Pharmacy Dance Declared Success

LARGE CROWD

Pill Mixers' Function In Piazza Of Local Hostlery

"A great Party" was the universal verdict of some four hundred happy people who filed out of the Piazza of the Mount Royal Hotel early this morning following the outstanding social event of the college season, the Pharmacy Dance.

From first to last, from nine o'clock until long after the moon had passed into the misty air, the usually sober Piazza was the scene of a gay and brilliant function over which the Queen of Terpsichor serenely presided. The atmosphere was that of complete detachment from all the care and worry that is traditionally, though perhaps erroneously, supposed to surround the Pharmacist.

The music was in the capable hands of Jos. Kruger's Dance Entertainers. Irving Kruger was there in all his glory, his own sax as talkative as ever, and the rest of the instruments being quite persuasive in their different spheres. During the course of the program, serpentines and balloons made their appearance, and soon the air was filled with the pretty streammers. Noise-makers galore as well as curious head-gear added to the hilarity. An unusual feature was the free smokes of all kinds. The liquid refreshments supplied between dances was "punch" with a genuine kick in it. Favours of a lasting nature were passed out to everybody present.

The committee responsible for the success of the evening was: S. A. Barza, A. O. Regenstreif, I. Gesser, O. Dinovitzer, M. Fleischman.

The patrons and patronesses were Professor and Mrs. A. B. Moore, Doctor and Mrs. W. H. Hatcher.

Among those present were:

Bea Bishinsky, Norah Warden, M. A. Miller, Ann Skalnick, Bertha Hoffman, Annie Blumenstein, Dolores Del Rio, Rose Tananbaum, Margaret Flanagan, Sylvia Rosenfield, Ethyl Gesser, Florence Reznick, Tillie Mos-

M.S.P.E. GRADES

There has been a slight misapprehension regarding a statement made in the Daily yesterday concerning the restrictions that have been imposed on M.S.P.E. girls desirous of taking part in the Red and White Revue. This statement was to the effect that but one girl had made grades that permitted her to take part in the Revue, the necessary grades being an A in Gymnasium and Dancing, and a B in all other subjects.

This did not imply, of course, that grades have been low in the M.S.P.E. On the contrary we understand that one girl gained seven firsts, without fulfilling the necessary requirements for the Revue. What we intended to convey was that only one girl had complied with the particular grades specified.

We have since learned, since publishing the editorials, that two girls have satisfied the requirements, not one, as we had previously been informed.

TROUBLE AT VARSITY

The strike at Queen's University last year which caused a break in the friendly relations then existing between students and the authorities, was caused by the attempt by the authorities to punish two students whose proclivities outside the college grounds had supposedly attracted notoriety to their fair university.

The trouble brewing at the University of Toronto, however, is of a different nature. There the authorities are attempting to browbeat the Students' Administrative Council into calling for the resignation of the Editor-in-Chief of their official organ, "The Varsity," as the person responsible for certain views expressed in an editorial in that paper a week ago concerning the subject of "Petting." The said views consisted of comments, we believe, on a lecture which had been delivered by Dr. Ernest Thomas, in Toronto, on the subject, "Christian Marriage and Before."

McGill was also privileged in hearing Dr. Thomas on the same subject when he spoke in Strathcona Hall here on Monday afternoon, January 24th. Dr. Thomas treated his rather difficult subject in a sane, kindly, and eminently wholesome manner, frankly presenting what he personally believed to be an ideal condition before and after marriage. Those who heard him were deeply impressed with his sincerity and desire to reach the roots of the question. He merely offered his opinions for what they were worth, and did not in any way attempt to inflict his ideas on his audience. His whole thesis was that there was an ideal which was worth working for and waiting for in the pre-martial relations of men and women. He recognized the fact that the normal age of marriage is nearer thirty than twenty in our present organization of society, and that therefore the problems presented during this long premarriage period were often very acute. He emphasised the fact that the human species have developed certain gestures with which the two sexes can express their love towards one another, and pointed out that if these gestures are employed promiscuously on various persons their values and meaning will be cheapened so that when a deep and abiding love enters an individual's life, that individual will be bereft of gestures with which to express that love. He further stressed the value of work and interest in other things to tide over difficult periods in the individual's emotional life. The responsibilty of those of this generation to those of the generation yet unborn in handing down to them the heritage of a clean mind and body must not be shirked by those who consider themselves willing to obtain an abiding satisfaction in their lives. This is, in sum all Dr. Thomas said. Any intelligent person must recognize the deep truths and values underlying what he had to offer from his own experience and that of others on the question.

The Editor of the Varsity then wrote an editorial in which he gently ridiculed this "middle-aged clergyman who told his hearers in gentle tones and with irrefutable logic that petting was dangerous and that it should not be practised." This attitude of sarcasm is as unfair as it is ungrounded. Instead of attempting to regute his ideas with the same "irrefutable logic" which he admits Dr. Thomas used, the Editor paints Dr. Thomas as a female Santa Claus raising his hands in horror at the antics of the younger generation. Anyone with a personal acquaintance with Dr. Thomas knows that he is anything but a fit subject for such portraiture. He is a sensible man possessed of great knowledge and experience of the ways of the youth of today. He is accused of claiming that petting was a new institution, when he stated definitely in his lecture that he recognized that had been in existence ever since man was created.

Again, Dr. Thomas did NOT see any cause for alarm in the situation, as the "Varsity" claims he did. The Editor's claim that "petting has come to be recognized as an institution" is a truism and does not conflict with what Dr. Thomas said. Further, vice, white slave traffic, murder, and all forms of debauchery, have come to be recognized as "institutions" in the same sense as petting has, and their mere existence is no argument for their ligitimacy, as the "Varsity" appears to suggest. Dr. Thomas admitted that "standards of all kinds as well as morality have changed," and he merely attempted to suggest a standard which the youth of today may not accept as they will. The "Varsity" 's claim that "petting is simply an exchange of amenities which make no difference when the 'grand passion' is experienced," is based on ignorance of the psychological mechanism of the human organism. Any emotional experience has a lasting effect on the individual concerned, and the memory of countless promiscuous caresses cannot but intrude and destroy the contentment and happiness which surrounds that same "grand passion."

Although we do not agree with the sentiments of the editorial in question, we do not se how the authorities at Toronto are in any way to be supported in their attempt to force the Students' Administrative Council to call for the resignation of the Editor of their official organ. If the Council fully supports him in his views, as they have every right to do, the authorities have no ground t oprotest, for the "Varsity" is an organ of STUDENT opinion, and whatever they may have to say on matters concerning students and their problems should be their own affair. The Students' Administrative Council, is, therefore, properly standing firm in their attitude, and supporting the Editor to the best of their ability.

The subject of the editorial is a small matter compared with the principle of autonomy of the students in their own affairs. We believe that the University of Toronto authorities will take the common-sense attitude of recognizing that autonomy, and that the matter will be amicably settled. If they were to persist, however, in forcing an action upon the Students' Administrative Council, the Editor of the "Varsity" should, we believe, be supported by every man and woman in the university, whether they agree with the editorial or think it ill-advised as we do. The larger principle must be the one which decides the attitude of every student at Toronto. We trust, however, that further strife will not be necessary.

THEATRES

The New Stagecraft

This week has been a very interesting one in the local theatre, all due to one company, that at the Princess. Just when things were looking darkest—and it was pretty dark—along comes this ray of hope and inspiration, a grand combination of new ideas.

Opera is a peculiar thing, and we see so, little of it now-a-days that it is rather hard to form sound ideas on the subject. As originally conceived, it no doubt was intended to be an artistic blending of good music, including in this term the work of the composer, the singer, and the orchestra, and the dramatic properties of the theatre. On the continent it may be so even now, although from my slight acquaintance with the other side, it does not seem so, but on this continent opera has definitely gone to the "star" system. It is a regrettable fact that in the most cases one goes to see such-and-such a prima donna or so-and-so, the noted male singer, with the opera itself running a poor second.

Perhaps we may put it another way, that the star is but one of the traditions of grand opera that have grown up and hindered it; others are over-elaborate or artificial settings, awkward stage business. At any rate, all this has been swept away in one stroke by Wladimir Rosing. The result is so entirely different from the old that at first it takes one's attention from the opera, but after one becomes used to it, it proves a restful unity, far more convincing than the old style.

The various innovations have been mentioned from day to day in reviews of each opera; it may not be amiss to note a few of the more striking here. In "Faust", for instance, there are two tenors to sing the title role, the transformation being accomplished not by the clumsy old way of tearing off a wig and unbuttoning a cloak behind a screen, but by the use of lights, darkening out and up again. Mephistopheles wears striking costumes in red and black, varying in design with the scene, making a much more effective character than the old one with crimson tights, tail and horns.

Very effective use was made of the silver and black color schemes, notably in "Figaro". "Carmen" seemed somewhat strange without the usual Spanish atmosphere—cubist designs are rather ticklish things to handle. In "Butterfly" the series of larger doorways opening back to the outside proved a very neat bit of stage mechanism. Throughout all the operas there is simplicity in setting, the use of light to achieve effect and to suggest to the imagination rather than to depicting in detail. It is the note of the new theatre; it has been coming for some few years; now it seems to be well on the way, and as far as I am concerned, more life to it.

* * * *

The Players' Club has had the wisdom and fore-sight to see the way out of the darkness, and had it not been for the—in this connection—unfortunate arrival of the opera company they would have had the distinction of presenting for the first time in Montreal a play conceived, directed, acted, and stage in the new school of ideas. It is going to be interesting to see how they work on the representation of the various insects—the butterflies, the beetles, the ants, etc. not to mention their imaginary kingdoms. It is a play which anyone at all interested in the theatre will have to see; it is bound to cause no little comment.

* * * *

The stir in the calm waters of the University of Toronto calls to mind the troubles of censorship or the attempt at it. In literature, the theatre, or almost anywhere one turns today somebody wants to tell everybody else what to do. Our poor old Board of Censors of movies is but one manifestation; prohibition another. It seems strange that they can survive the absurd positions in which they place themselves, but apparently the end is not yet in sight. Perhaps the theatre column is not quite the place to go into the general question of censorship; at any rate I shall have some words on the subject as it concerns us—next week.

W. K. D.

P. G. Wodehouse On The Talking Movies

The objection that many people have to the talking films, that the voices are reproduced with a lisp, is crystallized in this letter from Mr. P. G. Wodehouse, the famous humorist, to the editor of The London Daily Mail:

Thir,—I am intenthly interethted in theth new Talking Movieth, and I therlouthly think they have a thimply thtupendouth future.

I exthpect you know the chanthes of a young writer in thith line better than I do. Could you tell me if they would buy a theario from me, the thene thet in the Thouth Theath, and the thtorty all about a young man with no roof in hith mouth, who falth in love with a beautiful girl with the matht awful cold in the head?

There ith altho a villian, a beatht of a fellow with adenoitht, who ith known all throgh the Thouth Theath ath Thlimy Tham. He geth thwallowed by a thark ath the loverth are thailing into the thunthet in a thloop (which ith a thort of thmall thip).

It all thoundth very thuitable to me.

P. G. Wodehouse.
17 Norfolk-street, Park-lane, W.1.

At The Theatres

PRINCESS — Return of French Musical Comedy Company in "Trois Jeune Filles Aux Folies-Bergere," and "Reve De Valse."

ORPHEUM — "Paris Bound" — noted drama of divorce, with Helen Kingsley and the Orpheum Players.

GAYETY — "Hello Paree" — burlesque.

PRINCESS

Owing to the great success achieved by the French musical comedy company at the Princess for the past two weeks, Mr. Wright has returned this attraction for one more week, which will witness its last appearance in Montreal, as the company will then make a tour of the States.

Next week the company will be seen in two of the latest successes now in Paris. On Monday, Tuesday and Saturday evenings, at the Wednesday and Saturday matinees, Raoul Moretti's "Trois Jeune Filles Aux Filles Aux Folies-Bergere" (Three Young Maids at the Folies-Bergere) will be given. This show has been the talk of all Paris, having had a run of over 2,000 performances, at the Theatre Des Nouveautes, and is still doing a record business in the provinces.

On Wednesday, Thursday and Friday evenings, and at the Thursday matinee the company will be seen in Oscar Strauss's "Reve De Valse" (Dream Waltz), for the presentation of which, the company will be enlarged by a chorus of twenty-five people, who have been rehearsing for the last four weeks.

The company will be seen here intact, and will include Servatius, who has won Montreal by his great skill as a comedian. George Foix, the eminent tenor, Sonia Almy, who has captivated all with her charming personality, Ginia Berty, the soquettish little comedienne, Jane Lacoste, Jane De Joumayray, Yvette Herbeaux, Alice Penven, Marion Gaillard, Jose Daufy, Lucien Delfeuilhe, Gaston Garchery and Lorenzo Pazzi-Preval. New scenery and costumes will be in evidence for these two musical comedies.

ORPHEUM

One of the brightest efforts of the younger generation of playwrights, "Paris Bound," will be the attraction at the Orpheum theatre next week. This interesting drama by Philip Barry has, for its theme, the futility and menace of divorce, and it is also a drama of youth triumphant. Against a familiar background, the two chief characters of the drama, a supremely happy young couple, move as living entities. Then, like a bolt from the blue comes the first blow. The young wife learns that her young husband had one lapse from conjugal fidelity. At first she refuses to believe it, but once she is convinced, she announces her intention of fleeing at once to Paris to seek a divorce.

With her feminine nature athrob to her wrongs, with all the complexes of her feminine soul aroused to sudden and acute significance by this utterly unexpected and unbelievable revelation which brings her idol shattered at her feet, she, the impeccable Mrs. Jim Hutton, nearly succumbs to the same temptation as that which proved too much for her husband. So, when he comes back to her from abroad she accepts his caresses, forgives him, and decide that they will forget and start all over again.

From "Paris Bound," they become country bound, and rush off for a trip in the automobile, like a couple of kids, which in reality, they really are still. Once more, the divorce mill is cheated of its victims by the healthy reaction of ebullient and optimistic youth.

This play is rich in gripping situations, in dialogue that at first challenges and then startles, in plain speech and in a series of cleverly built up climaxes that keep the interest of the audience at top pitch from the very outset. It is a modern drama of modern life and one of its greatest problems, handled without gloves, with courage, and with skill. In the role of Mrs. Jim Hutton, Miss Helen Kingsley has one of the best roles any young actress could desire.

GAYETY

"Hello Paree," a burlesque show the better kind, and repleto with sensational surprises, as well as with songs and dances is billed at the Gayety theatre next week, starting Sunday evening. This company is made up of such leading artists as Lou Shaw, Billy Schultz, Bernadette Smith, Billy Woodall, Eddine Innes and others equally well known. Lee Hickman, comedy artist and Mildred Franklin, with her fetching songs, are featured. They need no introduction to Mutual burlesque audiences. "Hello Paree' contains all the elements of an up-to-the minute diversified entertainment. Rollicking fun, singing and dancing by a full corps of lavishly costumed charmers may be pleasantly anticipated. Paul Kane's Beauty chorus will be seen in new and fascinating dances.

ELIZABETH JANE
(Her Column)

CONCERNING POETRY
What is it?

The question is often asked, "What is poetry?" Thousands of people have been rash enough to attempt to answer this question, and the same number of thousands have failed to do so. Why attempt to define poetry? In doing so one only obscures the main issue which is, after all not "What is poetry?' but "What poetry is." Herein lies an infinity of difference.

There are two schools of poetry. One which believes that their products should be entirely impersonal, an insight into the world without any subjective material whatsoever, with no reflection of the author to be seen within, or between the lines, the acme of objectification. This school does does not, to my knowledge, exist. If it ever did, which I greatly suspect, it has been dead for ages innumerable The other school is that of Keats, Byron, Shelly and all the great poets from the beginning of history. Every line of Keats' expresses his mind and his soul. Every line contains the spirit of his very existence. What poem of Byron's does not show some intimation of his general views, whether on politics, marriage, or any other subjects that occupied his mind almost constantly. The soul, mind, heart and ideals of this school of poets is obvious and the man is pictured in his poetry. This is the only school that exists in reality. It is absolute and embraces all the lyricists of history.

Some people think that there is nothing in poetry. These are the ones who are utterly condemned to remain what they are. Poetry is the one thing that can take one out of oneself, which is the one thing that most if not all, people need.

And still I have not defined poetry.

✣ ✣ ✣

Dear Editor:

Is it true that the South African students had tea in the Union Cafeteria, and is it true that they asked for a large pot of tea and thirty-seven saucers?

Yours in Consternation
E. Jane.

✣ ✣ ✣

ON JUMPING AT CONCLUSIONS
Is it ethical?

There is always the great question as to whether one should or should not jump ot conclusions. In the greater number of cases it should not. For instance the first conclusion I jumped at, I fell and bumped my then little head and began to sing grand opera. The last one let me fall equally hard, but a little less noisily.

Miss Crabbe and myself are the object of lots of peoples jumped at conclusions. What are we? Why are we, and what for? Still most, or almost all of these conclusions are erroneous. How many times I have thanked good providence that more people do not know me! What would I, and they do if they did? I hate to think of it!

RED & WHITE
REVUE OF 1929

First Intercollegiate Basketball Game at M.H.S. Gym Tonight

McGill Seniors Tackle Western Quintet Tonight

McGill City Squad Meets Sun Life

COUPON NO. 15

With the stage all set for McGill's first intercollegiate basketball tilt of the season, which takes place tonight in the High School gym at 9 o'clock, when the Red men line up against Western excitement is running high around the campus.

The McGill senior city team will line up against the Sun Life quintet in the curtain-raiser of the evening at 8 o'clock. Coupon no. 15 will admit students to the gym.

Coach Van Wagner's proteges are all in tiptop shape and feel confident that they can beat the Western basketeers. The exceptional strength of the defense will probably be a large factor in the big game tonight.

The coach has some strong material in Faulkner, Young, McLean, and Grossman. These forwards are all experienced players and can be relied upon to put up a spirited tussle. Silverman, Peiker and Rice the McGill guards are hard men to beat and Western will probably find it difficult to break through. McBroom and Don Small the two plucky forwards who have forced their way to the front serve as excellent relief material.

The London city outfit will be out to win tonight in order to keep out of the cellar position. A bad start was made against Queen's, and Western is set on taking a fall out of the redmen.

Everything has been prepared to accomodate a large audience and no doubt every bit of available space will be filled when the referee puts the ball into play.

McGill students will find a special section reserved for them in the bleachers. Chic Parish is expected to be on hand to lead the noisemaking of the rooters.

Those who arrive at 8 o'clock will have the advantage of witnessing the McGill-SunLife clash. Both squads will be at full strength and a battle royal should take place. Captain Felgenbaum's redmen have been setting a fast pace of late and it would not be surprising if another victory is chalked up for the city team.

Bill Sellar is probable choice for the pivot position, flanked by Smalland McBroom. Halpenny and Felgenbaum are sure bets on the defense. Covshoff, who has been doing good work at the guard position with probably be seen in action. Talpis and Merrick are fighting hard for regular berths and will no doubt take part in the fray.

The two games form about as good a program as can be obtained for an evening's entertainment, and spectators should see plenty of action in both tilts.

Queens Trim Western Basketeers By 38-19

Opening Game Of Intercollegiate Loop

Kingston, Feb. 1—(Special to McGill Daily by Bob Clark, Queen's Journal) Western University basketeers offered Queen's little opposition in the opening intercollegiate game here tonight and the tricolor emerged victorious 38-19. The Queen's quintet showed surprising strength and were never extended to take the verdict. The Londoners exhibited plenty of nice passing but lacked finish around the basket. The locals were strong in all departments and after securing an early lead played straight basket ball and doubled the score. Cy Hauch was the visitor's star.

Line-ups:

Western—Myer RF. Ladoucer LF 7. Hind C. Cy Hauch LG 8. P. Hauch RG 3. Subs. Younge, E. Hauch, Ward Barbour 1.

Queen's—Sutton RF 12, McLaughlin LF 8. Dickey C 6. Durham LG. Elliott RG 6. Subs. Rose 4, Carter 2, Fenwick.

Referee—Percy Miller, Toronto.

Treats Subject Of Popular Arts

(Continued from page one)

better and foster the development of this art.

The speaker went on to describe the life of the peasants as observed by him, when, with a party of others interested in the same object, he made a tour of a number of small villages in Czecho-Slovakia. Here the peasant lives in a state of extreme poverty and simplicity, as compared with the agriculturists in Canada or America. Here popular art is preserved to a comparatively large degree. The interior of the home is painted ornamented by hand, and displays a degree of skill and beautiful effect that is scarcely credible. No less remarkable were the products of their loom and spinning-wheel, specimens of which were put on display by the members of the Handicraft Guild.

Each craftsman found in those humble village homes possesses the soul of a true artist. Their time does not mean money to them. The products of their toil, over which they spend much time and careful labour, they are unwilling to sell to any person, unless very much in need of it. Even then, they will take only a small sum. They take great pride in their costume, which they make by hand. "The customs and costumes of these people were the main reasons which led to their national insurrection."

For those who were interested in this sort of work, the best inspiration and instruction was to be found in homes themselves—homes such as these.

"A central institution is needed where the artists will take the trouble to collect the best designs of other days," said the speaker in concluding, we have a heritage that is going to be lost to us. We need co-operation of science, industry, and modern methods of labour-saving. We must develope a sense of tradition, of esprit-de-corps."

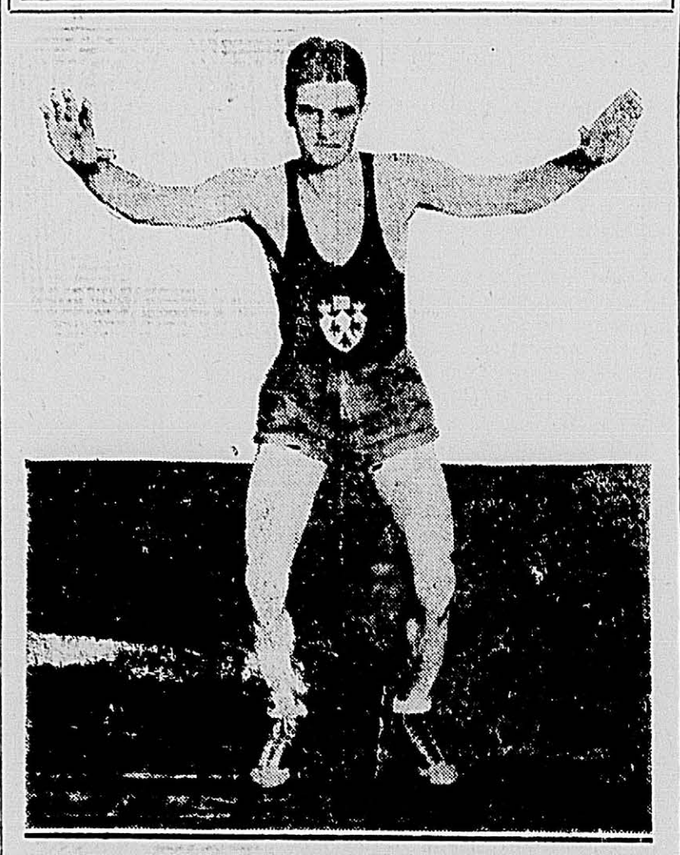
Varsity Ban Now Rests With Students

(Continued from page one)

Varsity co-eds headed "Amused at controversy" together with two double columns stories. Today "Star" carried two double columns stories on the front page one on alleged interview with unnamed students at McGill on the question "Petting" "The Star" also carried the pictures of most of the editors of "The Varsity" together with stories from several angles on petting.

All of which, your correspondent learns, has nothing at all to do with the matter at hand. A mere matter of sensationalism that has shown up the editors of "The Varsity" and the students of the Queen's Park Institution in a false light.

MAKES DEBUT



A. L. Peiker, guard of the McGill senior basketball quintet, who will make his first appearance in the intercollegiate at the M.H.S. gym tonight.

Jean Snyder Elected Captain

Macdonald Meets R.V.C. In Double-header

Jean Snyder has been unanimously elected captain of the R.V.C. Intercollegiate basketball team. The lineup of the rest of the team will be announced at a later date.

Macdonald College team will meet the R.V.C. Senior team today at noon in the M.H.S. gym. The later team were victorious in the last game between these two squads but it is rumored that the Macdonaldites have a strengthened line-up and today's contest should prove to be an exciting game. Following the Senior encounter the two Intermediate teams will face one-another.

Rooters from Mac will be out in full force and it is hoped that McGill supporters will also give their teams ample encouragement. There will be no change for admission. To the game.

The R.V.C. line up has not been definitely announced but the two teams will be composed of the following players; Johnson, Baillie, Whitley Chisolm, Morton, Snyder, Peden, Ferneyhaugh, Craick, Allen, Harvey-Jelley, Archdale, Ross, Carter, Jeffries and Dodds.

The probable Mac line-up will include; Gilmore, Holt, Dupres, Fleming, Knowles, Lee for the 1st team and Trowbridge, Reed, Palmer, Robertson, Sinclair and Dixon for the second team.

Junior Hockey

The following men are to be at the Forum at 3 o'clock this afternoon for the game with Loyola.

McHugh, Murphy, Chard, Willmott, Nevins, Taylor, Power, Bell Carlyle.

Juniors Battle Loyola Today

After a weeks lay off the McGill Junior Hockeyists get under way at the Forum this afternoon, when they face their old rivals from Loyola. Although the Red Men have no chance of copping the title they thoroughly intend sending the Maroon sweatered squad to defeat.

The McGill team will not be at full strength owing to the graduation to Intermediate ranks of Painter and Bedbrooke, but never the less, Coach Don Smith will send a formidable aggregation onto the ice.

McHugh will be in the nets for the red team, and he has shown rare form on several occasions this season. Murphy and Chard will likely line-up on the defense with Willmott at centre flanked by Nevins and Taylor. Power, Bell and Carlyle form an exceptionally strong sub line.

In the opener of the afternoon, Camp Oreida face Vics and the latter are favoured to take a fall from the Campers.

Southwestern Europe Home Of Cro-Magnon Man

(Continued from page one)

for the collection in their new "Hall of Man." The part which ornament played in the lives of these pre-historic peoples may be inferred from the discovery of the skeleton of a child covered with 2,800 shells strung together in necklaces.

According to Dr. Aml, the actual work involved in these excavations is very delicate. The specimens need at times to be exhumed almost with the aid of a feather, and much damage has been done by inexperienced amateurs who have attempted the work without proper supervision. The Government of France has complete control through the Academie des Beaux Arts of all the research work, and carefully inspects every specimen which is discovered. It allots a different division of territory to each party and examines all excavation from time to time.

Dr. Aml concluded his lecture with a pictorial description of the visit of the Canadian School to the caves of Count Begouin in the Pyrenees. A vote of thanks to the lecturer was proposed by Professor McBride, and Dr. Aml extended an invitation to all those present to view the exhibits of the pre-historic ages in the Museum at Ottawa, and welcomed them to inspect the Working of the Canadian School in France.

Red Team Face Varsity To-day

Men Arrive In Toronto In Best Of Shape For Tilt

TORONTO STRONG

Young Forward Line To Put Up Battle For McGill

Varsity—McGill

A running story of the Toronto-McGill game will be given in the Union this afternoon through the courtesy of the Daily.

Toronto, Feb. 2—(Special to McGill Daily by Lou Golden—Sports Editor of the Varsity)—The University of Toronto hockey team is in great form for their first intercollegiate game of the season with the McGill Sextette they have every man on the team in the finest condition and Jack "Red" Porter the coach has his team well rested after a strenuous few weeks in Ontario hockey association, which they are leading at present and are certain of a place in the playdowns.

The team that will take the ice this afternoon at the Varsity Stadium for the blue and white is as follows: goal, Snyder; defence, Whitehead, Paul; Centre, Stewart; wings, McMullen, Harley.

The McGill team arrived in the finest of condition and confident that they will put up a great fight against the O.H.A. leaders. No change in the previously announced line-up will take place. Farquharson will start at centre with Robertson and Ward on the wing positions. Smith and McTeer defence and Powers in goal.

The match will start at 2.30 this afternoon, and the advance sale is reported to be extensive.

Program For R. V. C. Ski Club Outlined

Ski Run Scheduled for Thursday Afternoons

An executive meeting of the recently organized R.V.C. Ski Club was held in the Arts Comm. room recently at which it was decided to devote every Thursday afternoon during the season, if weather permitted, to taking a ski run over the Mountain, time and place of such meeting to be duly notified members through the Daily.

Three runs attended will entitle members of the club to a badge. Four good skiers during each run will be on hand to advise or assist those less skilled. When it is decided to end a ski run with light refreshments at the R.V.C., a levy of 25c per head will be made on those taking part, notice of this to be given three days ahead of such run. Members signing to take part will be liable for this charge even though they should fail to turn out. Further notices of meeting will be published in the Daily from time to time. A week end party to the Laurentians is in early prospect.

College Wrestlers To Meet Y.M.C.A.

College wrestling fans will have a chance to see their men in action next Tuesday night in the Union ballroom, when a team from central Y. M. C. A. will meet the McGill squad. The meet will start at 8.15 sharp and the McGill entries will consist largely of the men who have been chosen to make the trip to Kingston for the intercollegiate assault-at-arms. Coach Frank Saxon of the Y.M.C.A. announced last night that his team would be chosen from among the following men:—

116 lb. class, Noel, Kirkwood.
118 lb. class, Lennon Smith.
128 lb. class, Tape, Foote.
135 lb. class, Munroe, Ovendene, Rowland.
145 lb. class, Thomas.
150 lb. class, Lemke.
160 lb. class, Stockton.
175 lb. class, Madison.

Last nights practice saw most of the college men back in action, but there is still need for men to practice with them. A special practice is scheduled for this afternoon at two-thirty in Strathcona Hall which all members of the squad are expected to attend. Coach Smith will be on hand so there will be no excuse for any one failing to show up.

R.V.C. Basketball

There will be a game with Macdonald College today at 12 P.M. in the Montreal High Gym.

The following will play:—Johnson, Baillie, Whitley, Chisholm, Morton, Snyder, Peden, Ferneyhough, Craik, Allen, Harvey-Jellie, Archdale, Ross, Carter, Jeffries, Dodds.

Swimmers Attention!

Trials in the following eevnts will be held Monday afternoon. ing are asked to be on hand. 100 yards breaststroke and 200 yards free style. The follow. Southam, Austin, Church, Payton, Lyman and Davis.

N.Y.A.C. Poloists Beat M.A.A.A.

McGill Wins Two Out Of Three Events

Last night at the M.A.A.A. the heavy New York Polo squad nosed out the Winged Wheelers, after a hard struggle, by the score of 5-3. The Red and White swimmers won the honours in the swimming meet, taking two out of three events, the 100 yards backstroke and the 160 yards relay, losing the 200 free style by only a few inches.

The N.Y.A.C. poloists had all they could do to score the winning goals, and if the Peel street squad had showed their usual form the game would have ended differently.

The visitors showed themselves to be well used to the game and their team work was better than the local outfit. Bill Hennings the captain of the Winged Wheelers, and their goaler, Cornforth saved the day for the home team. Hennings scored the three counters for the M.A.A.A. and if it had not been for the agility of Cornforth a good many more of the powerful shots of the visitors would have found their way into the net. The outstanding players on the invading team were Joe Ruddy and their goaler who was the despair of the M.A.A.A. forwards.

The first event of the program was the 200 yards free style which was won by Farley of the N.Y.A.C., whose time was 2.17 2-5. The McGill entry, Clayton Bourne, was not expecting to swimm this race, but he put up a great fight and finished a good second.

On the victorious McGill relay team were C. C. Bourne, Mort Gibbons, Gordon Poole and Munroe Bourne, who swam in the order named. Unfortunately for the visitors the third man on their team fouled. Otherwise they would have won the race instead of finishing an inch or two behind the Redmen.

The last race was the 100 yards free style, in which Munroe Bourne once more covered himself with glory, finishing up a good distance ahead of the second man, Leo Gibeau of the N.Y.A.C. Bourne's time was .18 2-5.

If the McGill swimmers and poloists show up as well in the meet tonight as they did on Friday evening they will be well worth watching.

McGill Meets N.Y.A.C.

Red Men Entered In The Biggest Meet Of The Year

Tonight the Red and White mermen will have a chance to win more honours for themselves, when they clash with the N.Y.A.C. in the biggest swimming event of the year. The program opens at the M.A.A.A. at 8.15 p.m. sharp with a 100 yards free style. Last night the winners showed themselves superior to the visiting team, and there is no reason to suppose that the McGill will not do as well tonight. The polo squad however have a tough battle ahead of them against the formidable New York aggregation. When Dr. Sullivan of McGill faces the ball McGill will start out by entering her full superior 57fs 4 the for th trta senior squad against the Americans. At half time three of McGill's most famous polo-playing graduates, Fisk, Eddie Quin and Al Goddard, will once more don the old colours, and, it is hoped will carry them on to victory once more.

The best race on the program will undoubtedly be the 440 yards free style, which will resolve itself into a struggle between the two rivals Olympians, the famous Ray Rudy of New York and Munroe Bourne, the McGill star. Besides this there will be a relay race, between N.Y.A.C. M.A.A.A., and McGill and exhibition diving by Mort Gibbons, of McGill.

To complete the program there will be a ladies polo game between the Columbus Ladies and the M.A.A.A. who are playing off for the Dominion title.

After the aquatic program is finished there will be an informal dance at the M.A.A.A. club house. The tickets sell at 50, 75 and $1.50, which includes admission to the dance afterwards. Tickets may be purchased at the gate.

Interfaculty Basketball

All faculties wishing to participate in an interfaculty basketball league are asked to communicate with F. M. Van Wagner, at 3484 University St., as soon as possible.

Winter Outing Club To-day

Program Announced For Various Competitions

SEVEN EVENTS

Continuous Performance From 10 A.M. To 6 P.M.

Winter Sports Program

10 A.M.
7 Mile Ski race.
2 Mile Snow-shoe race at Montreal Ski Club.
10.30 A.M.
440 and 2 Mile Skating race at Campus Track.
2.30 P.M.
Slalom race at Mount Royal.
3.00 P.M.
Ski Jumping at Montreal Ski Club.
5 P.M.
Fancy Skating at Hollow Rink.

Today is the big day for winter sports enthusiasts in the college. Skiers, snowshoers, speed-skaters, fancy-skaters, all will have a chance to show their wares in the various competitions which will be held. Yesterday some of the skiers had a chance to warm up in the exciting one mile downhill race, and today there will be winter sports competition starting at 10.00 o'clock and continuing through the day till six o'clock when the Winter Outing Club banquet will be held in the Union Tea Room.

10.00—7 Mile Cross Country

The cross country ski race will start at the Montreal Ski Club on Cote des Neiges Road. The large entry list should provide much competition for Derken, who last week won the Mount Royal Race, and Grayson-Bell the Ottawa freshman.

10.15—2 Mile Snowshoe Race

This event will also start at The Montreal Ski Club and will be run off while the skiers are out on their longer jaunt. This is the first time this year that Bill Gentleman's proteges have raced. The results should give some indication who will accompany the team to Lake Placid. Mr. Hay Finlay and Mr. F. M. Van Wagner are acting as timers for these events.

10.15—Speed Skating

While the skiers are running around the mountain, the speed skaters will compete on the Campus Rink. The events scheduled are 440 yds and 2 mile for men. The women students will also compete in a 440 yds race. These events should draw a large number of spectators from those who find Saturday morning lectures rather dull.

2.30—Slalom Race

Twelve skiers are already entered for this event and post entries will be accepted at the starting point. The course will be laid out on the usual hill east of the look-out. Competitors will meet at the lookout at 2.30 and from there will go to the hill. The newly formed R.V.C. Ski Club is planning to hold a short slalom race for the members under the guidance of the Winter Outing Club at the close of the competition. Dr. John Beattie will act as timer for these events.

3.00—Ski Jumping

Several of the members of the club are entered in the Montreal Ski Club Competition. Their standing in this event will also count for points, and for the college championship. As many of the students as possible are asked to attend the jumps and to help the McGill men win some silverware. The jumping is always interesting to watch, and this week the hill is in very good condition which should contribute to the brand of jumping. Contestants are to be at the club at 2.30 sharp.

5.00—Fancy Skating

Hamilton Bolton and Campbell Brown the two performers of the Winter Sport Team will stage an exhibition, and will judge a competition for the members of the girls Fancy Skating Club.

The strenuous activities of the day end with the Winter Outing Club Banquet in the Union, Miss Honey is providing a good meal and a large turnout is expected.

Col. Robert Stark the Honorary President of the club will be present and Col. Bovey is going to present silver spoons to the winners of the events.

Coaches W. E. Roughton of the skaters and Bill Gentleman of the Snowshoers will also attend.

As the banquet will be held early it is expected that most of the diners will attend in skiing costume.

Johnson Leads Winter Sports

Wins One Mile Race Yesterday Afternoon

Ted Johnson is high points scorer at the end of the first day of the College Winter Sports Championships. Yesterday's event consisting of the 1-Mile Downhill Ski Race. Johnson by his ability to negociate the difficult turns without falling, was able to turn in the fast time of 2. 1. 3", which was 1. 2." ahead of his nearest competitor Summer, the Arts freshman.

The course as laid out by Harry Pangman, was one of the most difficult in years, due to the excavations of the Montreal Tramway C., which cut across the course. An icy windswept hill on which to start did not give the skiers time to get set before they reached the rocks and dips of the latter part of the course. A long run through the trees gave the skiers sufficient momentum to sweep out on to Fletchers Field, where the finish line was placed.

The results are as follows:—

		Time	Points
1st	Johnson	2'1.3"	5
2nd	Summer	2'3.0"	3
3rd	Bell	2'3.4"	2
4th	Gillespie	2'24.0"	1
5th	Jost	2' 26	
6th	Ball	2' 27	
7th	Budden	2' 32	
	Laroque	2' 59	
	Houghton	3' 20	
	Chaput	3' 24	
	Brabander		
	Bernstein		
	Miller

Brain Kept Alive by New Discovery

Doctors Make Severed Head of Dog Live for Hours

AID TO SURGEONS

Artificial Heart Used in Experiments of Russian Scientists

Moscow, Feb. 1.—Sober and intensive study by Soviet scientists of the fascinating, yet terrifying problem of life and death at last is producing some remarkable results at the Moscow Chemico-Pharmaceutical Institute.

In the middle ages alchemists spent their lives in a vain effort to create artificial life. The history of physiology is replete with experiments in attempts to revive dead animals and persons. Today, in Moscow, probably the most remarkable experiments of this nature are being carried out.

Dr. S. S. Brukhanenko and Dr. S. L. Chechulin are in charge of the experiments. They have succeeded in creating an "artificial heart" which has kept the detached head of a dog alive, in so far as action and sensitiveness are concerned, for as long as three and one-half hours. The potentialities of an artificial heart in the sphere of practical surgery are unlimited, the scientists believe. It was pointed out that if an apparatus can be perfected which would keep a patient alive for even a few minutes by means of mechanical blood circulation, an operation could be performed to make necessary surgical repairs on the heart.

Dr. Brukhanenko said that the experiments have shown that the body of an animal lives for at least three minutes after the heart stops beating. If the blood can be kept from congealing by chemical methods, he continued, there is the possibility that the animal may be revived. This is the theoretical basis of the experiment. The process of death, according to the experiments, is active rather than passive; that is, it is a continuous process in which different cells and tissues cling to life longer than others. In testing this active process, the scientists point out that the fact that a dog's head has been kept in a state of life after severing it from the body, proves that the brain retained life after the body was "dead" and only needed to be fed blood and air again to "awake."

The records at the instute show in detail how the artifical heat worked when attached to the severed head of the dog. The experiments has been repeated several times before such scientists as Professor Furskoff, of the Brain Institute. The results have been reported in detail to the all-union congress of physicholigists and have been published in scientific magazines here and in the Journal du Physiologie in Paris.

This experiment, however, is considered as only the small beginning of the work, which aims to reveal the laws of death. Dr. Brukhanenko enducted your correspondent to the laboratory and demonstrated the apparatus. The artificial heart is a prosaic looking affair of glass, rubber and metal attached to a dynamo. Its very simplicity is impressive to the layman. Dr. Brukhanenko poured water into the central glass reservoir and turned on the current. Soon the heart was visibly "beating" and the water was pumped into one set of glass "arteries" passed through a "breathing apparatus" where it absorbed oxygen and completed the circuit, being pumped back into the reservoir through another set of "arteries". The entire action is authomatic.

Of course, in the actual experiments real blood is used instead of water and the two set of "arteries" are joined to corresponding real arteries in the severed neck of the dog.

Dr. Brukhanenko showed the correspondent detailed records of several experiments, every moment having been recorded. He also showed photographs of the subjects of the experiment during the "revival."

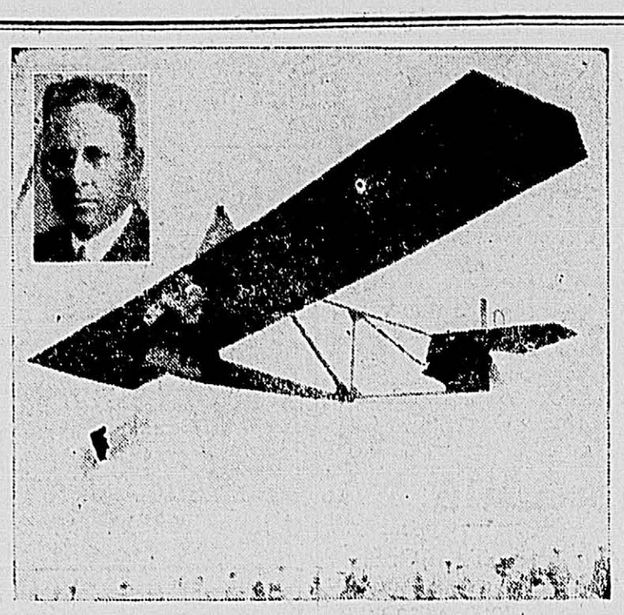
Jazz, Oregon Style, In Store for Orient

Eugene, O.—The Orient will have a chance to hear American classical music and American jazz (Oregon flavored) for the next two months.

For Jack Reynolds, Junior Revue star, and four mates of the musical scale left the campus on January 21 and embarked from Seattle on board the S. S. President Pierce, for a two-month tour of the Orient.

The five-piece orchestra, composed of Cliff Bird, Al Woodroof, Merlin Drury, Gene Burt and Jack Reynolds, will do their stuff in all of the big oriental ports in Japan, China, and in the Phillippines and Hawaii, as well as on board the American Mail line steamer.

All five of the men are well-known on the campus as musicians. The company expects to be back by spring vacation so that Reynolds can take part in the Junior Revue, in which he has done Jazz dancing specialties for the past two years.



The glider illustrated above is the type of ship the National Glider Association is sponsoring for use by all beginners in gliding and simple soaring.

Insert. Edward S. Evans, President of the newly formed Glider Association.

Public Officials Should Take Course

Schools Of Administration Urged For Future

Stanford.—"Every university should have a school of administration—state as well as municipal administration—a school that should correspond to a good school of medicine, a school practical as well as theoretical—like a good medical school." So says Will Durant, according to Gunnar Norberg in the Stanford Daily.

Seated at a little table—a typewriter at his elbow—in the room in which he was doing his writing, Dr. Durant, the author of "The story of Philosophy" and of "Transition" spoke early Monday afternoon at the Hotel St. Francis, San Francisco, during an interview given the Daily—spoke of a new sort of school open only to holders of bachelor degrees, a school where future tenants of public offices—in city, state, or nation— would have to be educated before they could even be candidates for any public post they might wish to hold.

Not Eligible Unless Trained

"Like a good medical school, for instance We have some pretty good medical schools, haven't we?" Durant answered his own questions. "No, but we did not always have good medical schools—but, we have some pretty good ones today.

"Just as no one now is permitted to prescribe medicines unless he has received specific and extended preparation—just so, ultimately the hope would be, that nobody would be eligible to public office unless he had first been trained in such way as I propose, in such a school of administration as I would have in every university."

"This school of administration: what would you have in its curriculum?" Durant was asked.

"Curriculum? That is not for me to say. The city managers, the mayors: they would have to decide what that would be." Durant smiled. Not so long ago had it been since he, Durant, had spoken naught too highly of mayors, and such. Though he would say nothing of what the curriculum of the school he proposed should have in it, he said this: "I would have the course of study cover a period of 4 years, and further that he would have established as a prerequisite to matriculation in a school of administration graduation from a college.

"Not only would I have these schools established in the universities, but I would also build up public opinion so that the voters would in elections prefer men graduated from these schools of administration.

"The final goal would be the elimination of nominations. People would be free to vote for anyone, properly trained, who would offer himself as a candidate for office—the lower grades of public office at first, of course You would not have a man just graduated from a school of administration running for mayor of New York City. Would you? No.

"A successful career in a lesser public office would be demanded of a man who would offer himself for a higher one."

This limitation of those who might hold public office to graduates of schools of administration would have a profound effect on a certain conception, more or less current in America today, of what democracy here in these United States entitles a man to.

Restrict Democracy

Said Durant, "Of course, the democratic right to be elected to office would be restricted. To offset this we should have equality of educational opportunity. There should be provided municipal and state scholarships that would make possible the sending on to higher institutions of those best fitted to go on.

"Every adult should have the right to vote and every person should have an equal opportunity to fit himself for office. But public office should be open only to the fit.

"I do not pretend to solve any economic problem. I do not urge rule of the strong by the weak. What I do say is this: a person who would hold public office should be at least trained as well in his way as a person who would practice medicine must in another way be trained

Players' Club

REHEARSALS

It is imperative that every member of the past appear at the rehearsals ON TIME.

SATURDAY—4 P.M.

ACT II

Misses Black, Stein, G. Gilson Murray.

Messrs. C. Dale, Broderick, L. Shelley, G. Nicholls, Lapin, and D. Eve.

SATURDAY—5 P.M.

ACT I

Misses Bovey, and R. MacDonald.

Messrs. H. G. Donald, J. Desbaillets, T. Gillespie, and D. Eve.

MONDAY—3 P.M.

ACT II

Misses Black, Stein, G. Gilson.

Messrs. C. Dale, Broderick, L. Shelley, G. Nicholls, Lapin and D. Eve.

MONDAY—5 P.M.

ACT III

Miss Black.

Messrs. D. Eve, Sir Pierce, P. Sise, Poland, Levitsky, Broderick, Hanbury, Black, G. Gales, Nicholls, Halpin and Roberts.

Will Robert Picard please turn out at 4 o'clock.

Dr. A. V. Douglas At Physics Club Last Evening

(Continued from page one)

observer were to be on some very distant star, he would see our solar system as part of a great spiral nebula, in which we would be near the edge and the Milky Way at the centre. If this is the case the stars under examination are in a region many more meteorites, comets and other bodies than the region we are in. Millions of these bodies must come in contact with Nu Aquilae and the Pole Star every second and be absorbed by them.

Spectrums of comets, Halley's for example, show the presence of cyanogen in them especially in their heads. It has also been noticed that when a comet passes very close to a planet during its orbit and is disrupted, a shower of meteorites occurs the next time the comet is due. Meteorites are therefore probably of the same composition as comets, and contain cyanogen.

Since molecular cyanogen could not exist as an intregal part of Nu Aquilae and the Pole Star on account of the high temperatures which obtain in them, Dr. Douglas believes that the cyanogen present comes from the large number of meteorites which are continually falling on those stars, and that this cyanogen is immediately decomposed. Accordingly, when these stars are at their maximum volumes and are approaching the Earth at their greatest speeds a larger number of meteorites will fall on them, and this is precisely the time when cyanogen bands on their spectra are at their greatest, confirming Dr. Douglas' theory.

C.O.T.C. Orders

SPECIAL ORDERS BY
Major J. W. Jeakins, M.M., O.C.
St. Johns, Que.

All cavalry cadets who intend to write examinations for "A" and "B" Certificates will parade on February 3rd at the Windsor Street Station for the purpose of proceeding to St. Johns, Que. Cadets will be at the station by 8.40 a.m. The return train leaves St. Johns at 7.20 p.m., arriving in Montreal at 8.10 p.m. Dress: Service Uniform.

Lieut A. W. D. Swan will be in charge.

J. W. JEAKINS,
Major O.C. McGill C.O.T.C

Arrange Summer School Courses

Facilitates Study of French Language and Culture

For the third successive year a holiday Summer School in French will be operated from Canada by the Overseas Education League with the co-operation of the French Ministry of Education. These courses, an annual feature of the school vacation period, have been arranged to facilitate the study of the French language, culture and civilization in the country itself. Three courses are arranged for the benefit of beginners, those especially interested in the teaching of languages and a class in Literature, Art and Social History.

Students at the Lycee Victor Duruy, where the school will be held will find the English language taboo at meal times and will, the announcement circular states, have facilities for controlled practice in conversational French in small groups under resident teachers of the Lycee.

In addition to the school period a certain amount of sight-seeing has been planned giving the students an opportunity to see something of France and England over there.

Special trains from Toronto and Montreal and special C.P.R. equipment will convey students to Quebec where they will embark on the Empress of Australia July 2nd with members of the English Summer School. They will disembark at Cherbourg for Lisieux in Normandy where the first five days lectures will be given and from which point excursions will be made to Falaise and Caen. For a month July 14th lectures will be held in the Lycee Victor Duruy at Paris, after which the party will proceed to London.

Week At London

The London week is free of all organized programme and while there students will be accommodated at Whitelands College, Chelsea (in keeping with the practice of the Overseas Education League to conserve its members funds by providing College residence). Members of the French School will join the English Summer School at Winchester on August 20 proceed with them to Southampton the following day to embark for Montreal on the Duchess of Richmond.

Advance estimates of the cost of the eight weeks' trip made by the Overseas Education League name $515 as the probable figure.

An additional expense, which is not expected to exceed $25, will be the cost of tuition and staff fees which will be divided pro rata amongst members of the school.

Jobs Open In Civil Service

(Continued from page one)

sioner's salary, exclusive of living allowance, is as follows:

Grade 1	$3180-4080
Grade 2	$4380-4980
Grade 3	$5280-5760

7.—Unmarried Junior Trade Commissioners are given a preference in appointment, in view of the cost of assigning an officer to a foreign post as such cost is the expense of the public. Transfers or promotions abroad are also made at the public expense. This includes the family and household effects of the officer so transferred or promoted.

8.—The Department is unable to guarantee that applicants will be assigned to any special part of the world, as such must rest upon conditions at the time of assignment, transfer or promotion.

9.—Successful applicants can avail themselves of the Civil Service Life Insurance and Superannuation schemes.

10.—A vacation of three weeks is allowed each year; though Trade Commissioners stationed at unhealth posts are returned to Canada every two years for a somewhat extensive tour, at which time holidays can be taken. Those in semi-tropical countries are returned every three years, and where ordinary climatic conditions exist they are returned every four years. Leave may be accumulated for two years under certain conditions. Trade Commissions returning to Canada for official tour receive their transportation and living expenses for themselves and family up to the number of five.

Notices

Notices must be legibly written on one side of the paper only and must be in the McGill Daily office before eight o'clock on the night previous to publication. Brevity is essential. Under no circumstances will notices be accepted over the telephone.

ARTS FRESHMEN PHOTOGRAPHS

All Arts Freshmen desiring class pictures must give their names and seventy-five cents (for mounted) or fifty cents (for unmounted) to Bill Sellar, who will contrive to be in Bill Gentleman's office between lectures. No order can be given unless paid for in advance. Since the Freshman-Sophomore Banquet, the class executive of Arts '32 have adopted the old Spanish saying of "no dickee—no washee" as the definition of their future policy.

WOMEN STUDENTS

A supper meeting of the S.C.A. of the R.V.C. will be held in Strathcona Hall Monday at 6.15 p.m. Five women will speak briefly on "Vocational Opportunities for Women."

INFORMAL DANCE

Tenders for an orchestra for the Union House Informal next Friday, February 8th are called for. They should be handed in by Monday to Eric Adams at the Union.

SPEED SKATING

Practices are held every Monday Wednesday and Friday at 5, under the direction of Mr. W. E. Roughton.

ATTENTION EXECUTIVES

Clubs, societies, and executive groups wishing to have their pictures featured in the Annual this year must make arrangements to have these taken as soon as possible. A receipt form for $7.00 when presented at Notman's entitles the group to a sitting. These receipt forms may be obtained from George Brown, Arts 4, or William F. Thomas Sci. 3 Kindly get in touch with the above as soon as possible.

ATTENTION MED. STUDENTS

The medical student who submits a drawing for the menu cover for the Medical Dinner which is accepted by the committee, will receive a free ticket for said dinner. Drawings must be handed in to Miss Mudge by February 2nd.

ROWERS—ATTENTION!

The machines are now in our quarters in the Field House. Please remove clothing from the room in the Union as soon as possible. Lockers will be supplied. Training hours—3 to 6, every day. Everybody out.

ARTS II

The following men have not submitted to their physical examination as yet: MacKenzie, Marcus, Wheeler, Ogulnick. **They positively must report as soon as possible at 3484 University Street.**

JUNIOR PROM

Junior Prom Picture will be taken at Notman's Tuesday, Feb. 6th at 5.30 o'clock, instead of Monday.

MACCABAEAN STUDY GROUP

The first meeting of the Maccabaean Study Group this session will be held on Sunday, February 3rd, 1929, at 8.30 p.m. at the Omicron Alpha Tau Fraternity, 306 Prince Arthur Street West.

Mr. Gabriel Yellin will deliver a paper on "The Jew in Classical Literature."

All students are cordially invited to attend.

OLD SCOUTS CLUB

The Old Scouts Club will meet in Strathcona Hall on Tuesday, February 5th at 5.30 p.m. The speaker will be announced later. The usual camp supper will be served at a very nominal cost. All those desiring to attend are requested to leave their names at Strathcona Hall or else with either Phil Matthams, Ken Austin, Bob Calder or Hyman Shapiro.

INDOOR RIFLE CLUB

The "choose your own handicap" spoon shoot will be held at the Montreal High School range this afternoon at 2 o'clock.

SUSPENSIONS

McNaughton, M., Sci. IV.
Harris, Harry H., Arts III.,
Castle, S., Science III.
Rubin, Lionel, Arts III.

REINSTATEMENTS

Addie, G. R., Arts III.
Cohen, J. M., Arts II.
Acena, J. G., Sci. III.
Apter, R. F., Sci. III.

POSTER COMPETITION

Open poster competition for Women's Basketball meet. For particulars inquire of the R.V.C. class poster managers of Eunice Meekison Poster Manager. A prize is offered. All posters are needed by February 9th.

IMPORTANT.

SOCCER CLUB PICTURE

Picture will be taken on Tuesday at 4.30 p.m. Not Monday as announced.

LOST

McGill Ring, name engraved inside Finder please leave with Bill Gentleman, Arts Building.

L. Rose, Arts '30.
